The Weekly is issued every Saturday morning, and contains all the news of the week. The Daily is published every morning and evening. The Weekly contains the matter of the Daily, omitting only the local matter of a temporary character.

THE CHICAGO TRI-WEEKLY TRIBUNE is published every Monday, Thursday and Saturday, in time for the earliest mails. It is of the same size with the large Morning Daily, and contains all the reading matter of two days. This is a desirable edition for residents in the country. It will be mailed to mail subscribers at the low price of $3.00 a year.

PARCELS DAILY WEEKLY TRIBUNE contains all the valuable matter of the Daily, comprising the latest intelligence by Telegraph and Mail, Market Reports, Literary notices, and choice Story each week, and excellent Miscellany, and furnishes more reading than the large sheet of the New York Weekly Tribune. It is published every Saturday morning, at $2 a year in advance. Two copies to one address, $3.50. Twenty copies to one address $35.00.

CHICAGO, MONDAY, MARCH 21, 1853.

JOB PRINTING.

We have a splendid lot of New Materials, and the Facilities are now complete for doing all kinds of JOB PRINTING in a short notice. Those wishing it in a cheap, neat, and workmanlike manner, will find it to their interest to give us a call. Orders left at the Counting Room, on the ground floor, next door to the Post Office, will be promptly attended to.

CHICAGO AS IT IS.—The demand for the annual statement of the Trade and Commerce of Chicago, published in Saturday's Tribune, far exceeded our calculations. Six hundred copies were sold at the desk before eleven o'clock in the morning, and the sale continued steadily till the morning, and the sale continued steadily till the morning, and the sale continued steadily till a late hour in the evening. We were obliged to publish two large extra editions, and yet we are confident that not a tithe of the papers which ought to go throughout the United States have yet been sent. It is impossible to estimate the advantage to Chicago which will accrue from a broad east sowing of this good seed. It is sure to bring forth a rich harvest of capital and on, enterprising people coming to settle here, manufactories started, and the circle of trade enlarged. Let every citizen, whether merchant, manufacturer, lawyer, or mechanic, make out a list of all his respectable acquaintances and send him a copy. We have put the price of the paper down to three cents in order that every one can do this without making any drain on his purse worth regarding.

☞ The large number of new advertisements for to-day crowds our local items into this page.

OPENING TRADE.—The first report of the arrival of arrivals and clearances on the canal will be found in to-day's paper.

FOR THE LAWYERS.—We publish this morning, for the benefit of the Lawyers of Chicago, something one hundred and fifty seven, and of that unfortunate class of people who go to law, something nearly as many more, a schedule of the Courts to be held in this year during the ensuing year. As every one is liable to want to know when a Court is to be held, either as juror, witness, plaintiff, defendant, counsel, judge, criminal or lunatic, every one would do well to preserve this schedule.

RAILROAD CELEBRATION.—To-day the good people of Peru, and all who will join with them, are to have a grand jollification over the completion of the Chicago and Rock Island Railroad to their flourishing young city. We understand a number of our citizens purpose going down this morning, and joining with our neighbors. May they have a good time! We regret that the demands of a daily paper will prevent us from accepting the kind invitation received from the citizens of Peru.

FRAUDS.—We are gratified to learn that Pork, Beef, and other rolling freights will nearly all come through this route the present season, instead of going South, as they have mainly done, heretofore. This is occasioned by the high freights between New Orleans and New York, which entirely prevents shipments by that route.

☞ We learn that from the day boats will run regularly from Detroit to Cleveland, in connection with the Michigan Central Railroad. Passengers leaving Chicago by the morning train will take the night boat at Detroit, and after a pleasant night's rest, wake up and find themselves at Cleveland. By this line passengers are now booked through to Buffalo, taking the cars at Cleveland. Fare to Cleveland $8.

MR. BRADBURY OF NEW YORK.—Our readers will note by reference to our advertising columns that the above named gentlemen is long and so extensively known as the children's Singing and Piano Forte teacher, having taught them by thousands, is now engaged as a dealer in Pianos and Melodeons, being compelled as we understand, to leave his field of useful labor in consequence of ill health. From his great experience with the Piano he must be qualified to judge of its merits. We cordially wish success, and recommend our readers to call him their orders.

Summary of News.

We refer to our TELEGRAPH NEWS FOR MORE important intelligence from Mexico, and sundry matters of interest from Washington, Baltimore, &c., and a railroad accident near Syracuse.

THE NEW YORK EVENING POST OF THE 19TH, says: "The money market shows no increased stringency. There is an active demand for money, but less so from merchants and traders than from speculators and stock operators. The great body of the trading community is well supplied with money. We quote rates at 8@10 per cent for prime paper, and 10@12 per cent for second class. Some of the banks discount for their customers at 7 per cent, but only for small amounts. The private bankers are still the largest lenders. On call, 7 per cent is the steady rate, with, however, considerable margins for the price of the securities taken. At Cincinnati in the same way, there was an increased stringency in the money market. Some of the banks there have thrown out the notes of all New England Banks except Boston City; and a portion of the private Banks have put all Eastern currency, except Boston, New York, Philadelphia and Baltimore City down to 1 discount, while others, citing to the high price of Exchange, continue to receive them at par. Of the notes of the Indiana Free Banks, none are received at par, except those of the Bank of Connersville, and at Prairie City Bank.

THE CITY COUNCIL OF LINCOLNSHI HAVE ADOPTED the volunteer system in the fire department, and established the paid system. This meets the decided approbation of the citizens at large, but some of the present volunteer firemen are very much opposed to it, and express their disapprobation in a riotous and outrageous manner.

WE HAVE ALREADY SPOKEN OF THE FAVORABLE intelligence from California, and of the large shipments of gold dust to the Atlantic. *Over two millions of dollars worth of the precious article was exported from San Francisco from the 31st of December last to the 16th of last month—a space of seven weeks.*

A NEW PAPER CALLED THE MAY QUEEN, JUST launched, is to form one of the line between Cleveland and Detroit.

A DEGREE IN THE PHILADELPHIA MURDER CASE has taken place. Young Spring, a lad of seventeen, testified that the sheath of the dirk, found by the body of Mrs. Lynch, was taken from him by his father, and his evidence otherwise tended to inculpate the accused man.—Spring says the boy some gold pieces, told him he had murdered two women, and had left one in the house, pretended to efface blood-stains upon his parrot. The testimony was conclusive, and the prisoner was committed.

NOTWITHSTANDING ALL THAT HAS BEEN SAID TO the contrary, it appears from results this member and ex-members of Congress are all-powerful in obtaining good fat offices at Washington, if not for others at least for themselves. The rank and file among the 234 Seants are of course classified at such rank and emolument particularly, and are starving all manner of ugly things about the President and heads of departments.

Furthermore, grave affairs of state intervene to delay matters awfully in the minds of those who are getting exceedingly hungry. They have our deepest sympathy.

THE NEW YORK HERALD ON CUBA AND SOUTHERN American States, says the *New York Herald*, is important and suggestive. War between Bolivia and Peru is threatened; Venezuela has announced her determination to pay off her share of the old Columbian debt; a new claim has come from the Pacific ports of Central America, is to be organized by Yankee enterprise; the Nicaragua Transit Company has got into trouble with the free and independent city of San Juan del Norte; and the exploring expedition along the Amazon, and into the heart of South America, is attracting the most lively interest in Bolivia, Peru, and Chili. Such are the points of the accounts from the States south of Mexico—All that part of the continent is in commotion. What does it indicate? South America is certainly in a transition state.

A TELEGRAPHIC DISPATCH SAYS THE PROPECTUS of the Ramsey route to California, had been declared of their contract by Congress refusing to vote an appropriation to carry it out. The correspondent of the Journal of Commerce, says the rumor is not correct, for the appropriation was made in the post office bill.

THE HON. JOHN CHAMP, OF BEDFORD, PA., DIED of apoplexy on Monday night. He was for nearly twenty years member of Congress from Bedford district, and at the time of his death was United States Marshal for the Western District of Pennsylvania.

THERE ON THE MICHIGAN RAILROAD CONSPIRATORS, whose trial was so protracted two years since, have been pardoned, viz: Erastus Smith, Erastus Champlin, and Dr. Farnham. Their pardon was recommended by the Railroad agent.

THE WASHINGTON REPUBLIC SAYS.—"In view of the copious learning, the long experience, the untiring energy, and the eminent talents in council and debate, which distinguished Col. Benton, we shall look to his appearance in the House as a new era in his history."

THE WHOLE NUMBER OF CLERKS IN THE several departments at Washington is 720, and their annual compensation $531,600. They are divided into four classes—those in the first class have a salary of $900; those in the second, $1,200; those in the third, $1,800; and those in the fourth, $1,800. There is also a chief clerk in each Department, whose salary is $2,000.

THE *New Haven Herald* states that the Woodbine Bank continued to redeem its notes up to the 12th, and its friends hope it will be able to weather the storm, and sustain itself through its present difficulties.

THE ANN LEE RAILROAD TO THE MISSOURI.—We stated a day or two since that the whole amount of stock necessary for the completion of the road to Savanna and Galena, $1,250,000, was taken, and some $60,000 over, which had to be rejected. Through the politeness of Curtis Hubbard, Esq., one of the Directors of the Road, we are enabled to publish the number of shares taken by the several Counties interested, and through which the road runs, viz:

Cook	1,648 shares	Ogle	90 shares.
Lake	50 "	Carroll	100 "
Kane	2 "	De Kalb	25 "
Jackson, Iowa	41 "		
Eastern subscriptions	4,000 "		
Total	15,451 "		

This some of the most remarkable subscriptions for the construction of railroads which has ever been placed before the public. Only for the want of wants for construction for the first time by a railroad, there would be nothing surprising in it, but the fact that a road, the route of which is to be paralleled for some distance very near to another, is actually in operation, should be generally advertised to, shows the great increase of business in Illinois, and between Chicago and the Mississippi.

☞ The *Bloomington Intelligencer* says that the owners of heavy stock in that city are running carriages daily, between that city and the point to which the Ill. Central Railroad is now finished, twenty miles north of that place.

☞ The Ottawa *Republican* says the Free *Democrat* has changed owners, and is hereafter to be a Whig paper.

New York Correspondence.

New York, March 14.

At Washington, during the month of February, the gay season is always at its height, and moved by pleasant remin'scences, your correspondent was attracted thitherward. Washington is the great social exchange of the whole country; here congregate the most original and interesting varieties of character, and while in New York or in any other city, they could not, by any possibility be brought into contact,—in Washington this contact is unavoidable,—and diverted, as it is of arrogance on the one side, and servility on the other, it constitutes by far the most delightful society to be found in the country. If any one would appreciate, as he never did before, the grandeur of our democratic institutions, he should mingle for a winter in the society of the capital. This year, the inauguration, as a matter of course, drew together a far greater number of strangers than usual, the by no means of the choicest character, but all added to the liveliness of the scene. The new President has been considered one of those who has had "greatness thrust upon him." but at all events he proves himself too strong to be overwhelmed by it; he is equal to the burden, and bears it with the ease and grace of one born to it. The pictures of him give but a mere map of his face in repose—the moment he speaks his countenances lights up with expression, and his stern features soften and radiate. Of a slight figure, and apparently not of robust health, in delivering the inaugural speech, we had not supposed it possible that he would be heard beyond a very limited circle, and we took a position quite remote from the immense crowd that thronged about the eastern portico of the capitol, but to our surprise every word was distinctly heard, his clear, ringing tones were perfectly audible to the most distant of his audience. He spoke without note, and his eloquent manner gave additional interest and force to the address.

One of the most interesting objects of art in Washington is Mills' Equestrian Statue in honor of Jackson, recently placed in the square opposite the President's house. The horse, which is in the attitude of rearing, rests entirely on two legs, self-sustained, as the genius of the artist, who was the first in the world to make this bold experiment, and who was criticised and ridiculed until his success was no longer doubtful. A cousin, equestrian statue of Washington, to be six or eight times the size of life, will be the next work of Mr. Mills, and an appropriation is already made for its commencement.

The President inaugurated, and the Cabinet appointed, having no interest in the distribution of spoils, they were turned over face homeward; and suffering from the annoyance of detentions, want of connections, want of breakfast and want of dinner, incident to the badly managed road between this city and Washington, we intercepted many devout aspirations for the success of Mr. Doty's "Air Line."

The tediousness of the journey was whiled away by the pages of *Villette*, the just published novel by the author of Jane Eyre. Villette has much of the power and intensity of Jane Eyre—the same marked and strong delineations of character, but on the whole, is not equal to it in interest.

It was a matter of great regret that on passing through Philadelphia, we were not able to see a piece of sculpture, recently arrived there, executed by Steinhauser, a German Sculptor at Rome. It is a monumental group, consisting of an angel, and two or three other figures, and is said to be the most beautiful work of art that has ever been seen here. It occupies a niche in the Church of Dr. Ducachet, and no lover of the beautiful will fail to visit it in passing thro' the city. There is another groupe by the same artist, at the Academy of Fine Arts, in Philadelphia—*Nero and Leando*—exquisite alike in conception and execution. There they

"Love in stone, and fill
The air around with beauty."

The Academy also contains many of West's pictures—"Christ Healing the Sick"—"Death on the Pale horse," and some others. But a picture by a German artist, *Witt Kamp*, not much known in this country, is by far the best picture in the collection. It is the *Siege of Leyden*, and represents the half-famished citizens, at the moment when the Lovegers are driven from their gates by the overflowing waters, and deliverance is at hand. It is full of power and pathos.

Moore & Pruitman, vs. the Michigan Central R. R. Co.

LIABILITY OF RAILROAD COMPANIES.—An important decision upon this subject, of general interest, has just been made by the Supreme Court of the State of Michigan. An action was brought by Moore & Pruitman, against the Michigan Central Railroad Company, to recover the value of a quantity of flour shipped on their road, consigned to J. C. Hitchcock, Buffalo, and lost in the Queen City of the West. Judgment was rendered for the plaintiffs in the sum of $1,647 68.

The following is the remarkable ground upon which the decision, ever to the extent of sixty and upon above indicated." The next Congress it is said, is to be invited to restore its adoption, again to the world the result of the first experiment.

Gymnastics.

There is a subject matter which I wish especially to commend to the attention of the citizens of Chicago. It is one of great importance as connected with health, happiness and usefulness, though concerning which most people, and especially educated people, are strangely ignorant—I refer to the subject of GYMNASTICS.—The deep interest I feel in the subject, as connected with health, induces me to describe briefly my own experience.

Five years ago the writer of this article was a miserable invalid. He was pale, thin, dyspeptic, desponding, and generally uncomfortable to himself and his friends. His chest was sunken, his posture stooping, and his gait listless. This unfortunate state of things was induced by a sedentary life and too close application to books and the writing-desk. Six weeks out-of-door exercise in the country wrought some improvement, and if it could by possibility have been continued might have restored vigor; but writing and study must be resumed, and it was a problem how at the same time to recover and retain health. In this emergency the advantages of the Gymnasium were set forth to me, and I was led to join the one of Charles F Ostignen, in N. Y. I spent about one hour of each day in the exercises and followed them with a bath. They consist in ascending a ladder with the hands in different ways, pulling and raising weights, turning the body in rings suspended from the ceiling, throwing the body along parellel bars, and, by a variety of methods carrying out the fundamental plan of bringing into full and thorough play and severe tension each of the three hundred and fifty seven pairs of muscles in the body. At the same time I was practising myself more or less, though with no great regularity, in the "breathing exercises," recommended by the vocalist, Russell, and the physician, Fitch.

These consist in inhaling pure air steadily and deliberately, until every air-vessel of the lungs is filled to its utmost capacity, and then expiring it as slowly as possible, taking care at the same time not to use the chest as a bellows, but to keep it out firm and full, and supplying the vacuum, caused by the expiration, by raising the diaphragm. Many perform this exercise with the assistance of a tube made for the purpose. I did not use one, but gained the object by contracting the muscles of the throat, in which there is the additional advantage of strengthening the vocal organs. This is the course recommended by Russell. A goose quill, cut at both ends, makes as good a tube as any, only it does not cost quite enough to be fashionable. In commencing those breathings almost every one is made faint; but this effect is soon overcome. Their power to increase the capacity of the lungs is truly wonderful.

My muscular strength began to increase immediately, and so steadily, that for months scarcely a day passed that I did not accomplish some feat impossible to be done the day before. Digestion improved in the same ratio, and soon became perfect. The color of health came to my cheek and elasticity to my step. My weight also rapidly increased. When I commenced it was only one hundred and thirty-seven pounds. At the end of three months, it was one hundred and sixty. In one fortnight I gained twelve pounds, or one each day, "Sundays excepted." I found it also a exhilirating pleasure to bring down the scales to the tune of one additional pound at every visit. (I made a present to my landlady in consideration of this circumstance.) In less than a year my chest had increased in size, by actual measurement, more than four inches.

The difference in the amount of literary labor that I was able to accomplish during the first winter's attendance at the Gymnasium as compared with the previous one was remarkable.—Previously I was exhausted by ninety minutes of continuous writing; but since, I have composed for *ten* hours with scarcely an interruption to the motion of my pen. My gymnastics cost *time*—nearly two hours of solid time out of the business part of the day, but I found it good economy to spend them in this way, as I could accomplish as much in eight hours as before in twelve. And, more than this, my "animal spirits" became exuberant. Joy and hope took the place of gloom and despondency. Existence became a delightful consciousness of being, was a delight—a luxury, and I felt when walking an almost incessant impulse to *spand*, from the simple excitement of perfect health. And only six months before life had been a burden; with sluggish step I had dragged myself about, while a settled foreboding of evil lay cold at my heart.

During the past five years the usual course of health has been interrupted only when I have neglected the Gymnasium, and by one slight attack of a contagious disease. During the last eighteen months, absence from New York has interrupted my gymnastic exercise, and I have found it difficult to maintain the vigor and elasticity of health I had previously gained. My experience is not an isolated one. I could multiply instances of the most striking restoration of health, of elasticity of mind, and removal of nervous debility consequent upon faithful attendance at the Gymnasium.

I recall now the case of an acquaintance who had been attacked with bleeding at the lungs, and was about going South as a *dernier resort*. She was also persuaded to try the Gymnasium, and though considered a confirmed consumptive, she went to work, improved daily, and at the last account stood as fair a chance for good lungs and a long life as any of us. I would also refer to the case of a lady friend who was suffering from general debility, and moreover was subject to sudden *faintings*, about which there was no affectation. With scarcely a second's warning, and without apparent cause, she would become completely unconscious. These increased in frequency until she and her friends were thoroughly alarmed, but could find no remedy. She was at last persuaded to attend the Gymnasium, and came to New York for the purpose. In a few weeks the faintings ceased altogether, and in three months her health was so improved that she surpassed most ladies in vigorous appearance and in muscular and mental elasticity.

I have no doubt that almost all cases of consumption, nervous debility, dyspepsia, and the theological bronchitis might be prevented, and many of them cured by this course. There is a need for many to Florida, or Hayti, or Europe, for health—only go to a Gymnasium.—We would appeal to young students, especially to collegians, to ministers, and to all those who lead sedentary lives, to think on these things.—Ye who have a slight "hacking" cough, or a miserable digestion, or an occasional headache, or a feeling of lassitude, and lack of energy, bear in mind that the cough may become consumption, the indigestion dyspepsia, the headache fever, the lassitude nervousness, and each and all an early death—and that these may be cured by vigorous gymnastics, you spared to your friends, an l a violation of Nature's laws not result in a "mysterious dispensation of Providence." You can have health if you will have it. Will you not take the comfort of having it? And to my readers of the gentler sex, I would respectfully but earnestly advise attendance at the Gymnasium. Ye who are pale and stooping, and miserable and "nervous," who are losing the bloom of youth at twenty-five, and becoming prematurely gray at thirty, you will find exercise the best of cosmetics. It will restore color to your cheek as well as roundness to your form, and happiness to your heart, too.—What say you to throwing back your shoulders, loosening the corsets, inflating the lungs, working at the Gymnasium, and becoming healthy and robust like the women of England?

The clergy especially should turn serious attention to this subject. They need, more than any class, the exercise and recreation which the Gymnasium affords. There is in my mind's eye now a young minister, with whose friendship I am favored, who needs precisely this and nothing else for his salvation. He wishes to do much good and he studies hard and preaches well. But he is beginning to feel "Mondayish," and before long he will feel *Tuesdayish*, and then he will need the tender sympathies of the female part of his congregation, and finally he will ask for a dismission on the ground of ill health, and that is the last that will be heard of him.

And is it not the duty of every college corporation to erect a Gymnasium, with gymnastics a part of the regular course of education, and if possible employ a Professor of the art? It is estimated that almost one out of every hundred young men in our colleges dies each year. Most of their lives might have been saved by proper bodily exercise. The "mens sana in sano corpore" is sadly neglected. Would we not all "rejoice more than one saved, than for the ninety and nine?"

But, one of my readers remarks, "All very well, your notions are good, but what shall I do? there is no Gymnasium with its ladders, and spring boards, and parallel bars, and ropes, and baths, and excellent instruction here in Chicago."

In reply I ask, can not one get a Gymnasium built in Chicago? If we are unable to do it individually, cannot some twenty of us club together and accomplish it? Or still better, will not some person put up one as a private speculation? The writer of this article, for one, would pay almost any price for the sake of securing such an important means of health and recreation. The cost will be as nothing, compared with the loss by the sickness from which it may be the salvation. And what shall we say to the lengthening of one's life ten or twenty years?

THE EXODUS FROM IRELAND TO AMERICA.—The Western Star gives a melancholy sketch of the sufferings of the poor for the last two months, owing to the want of employment consequent upon the impossibility of proceeding with outdoor labor during the late severe weather.—Great numbers were compelled to resort to the workhouse, and more, who have been fortunate enough to realize a remittance from their friends, and relations in America, are taking the necessary steps to join the donors across the Atlantic.

"We have reason to know (continues the Star,) that several of our poor people, who had intended to remain in the country for some time longer, on the large of realizing a small sum for their own labor, and thereby be enabled to make their voyage in more comfortable trim, on finding no chance of employment, thought better of at once taking their departure, fearing that, if they remained even for a short time longer, the money sent by their friends in America would be expended in trying to keep body and soul together; and thus, perhaps, their chance of being able to emigrate would have been gone forever. Owing to this state of circumstances, we have had an occasion of the 'exodus,' notwithstanding the inclemency of the weather, which heretofore gave some pause to the outward movement, but which, in the present instance, as we have shown, has rather tended to increase it. That the emigration will continue only when the population is drained out, for it must be borne in mind that there is scarcely an instance of a family or members of a family, locating in the republic, which does not speedily send for some friend or relative to join them before the lapse of many months; so that when you now talk to a man of emigrating or assisting to do so, the ones tells you that his house is across the Atlantic; that he was long enough homeless in the land of his birth; and that he intends to lose no time in joining his friends across the water, for it is another sign of the times in which we live that the Irish peasant does not at present look upon voyage across the Atlantic with half the dread his father felt at crossing St. George's Channel, when he was went to proceed to England. A harvest time to earn as much money as would pay their fare and support for those days when the Irish peasantry were in the language of the Devon Commission, "the worst fed, worst housed, worst clothed" population on the face of the civilized world.

Turning to the southern counties, the Waterford *Chronicle* thus reports progress:—

"We have every prospect of the present emigration being very much augmented during the present year. Numbers who had intended to do so will avert this; so that the least thing we can do is rather to endeavor to divert that emigration to what may be the best course in which to proceed it. The example, set by Mr. Scully, from Australia is of course have a tendency to turn attention almost exclusively to that quarter; the majority of the rising young now placed on so prominent a basis that it is not long ere a matter of speculation as to the choice of climate succeeding them. Our quay was literally glittering with passengers for Liverpool *en route* to America. Not fewer than 300 or 400 of our country people crowded the deck of the Mare steamer, quitting forever that soil which, however unfortunate it may be, is still the land of their fathers' sepulchres. Many have left behind the requirements of three ills present population.

We cannot but deplore that so many are going from the land of their birth, but we think that a check will speedily take place. Men will be sought after, and not, as they are now, seeking employment, or compelling for land."

Washington Matters—Appointments.

WASHINGTON, March 12, 1853.

The Cabinet—A Storm Brewing.

It were idle to disguise the fact that while the confidence which the President's inaugural has inspired remains still undiminished, there is much uneasiness in regard to the extent to which the President's influence will be suffered to prevail in the deliberations and resolves of the cabinet. Gov. Marcy is entrusted—he is supposed to have control of the State Department. Mr. Dobbin is supposed to entertain a bitter hostility against all those who had the least agency in thwarting his aspirations at the Baltimore Convention, when the President's friends secured a majority in the Senate. General Pierce's warmest and most potential friends are becoming restless, and say that they have been entirely overlooked in the bestowment of favor by the trickery of worn out politicians. They are conscious of their strength, and are not likely to let it lie dormant. Let Gov. Marcy beware, lest in his unbounded confidence in his interior potence to carry the burthen which loads his shoulders he does not deceive the country of its hopes.

Clouds are lowering ominously over the horizon, and there is a leaden heaviness in the atmosphere that betokens an impending storm. Mark this!

WASHINGTON, March 12, 1853.

A protracted meeting of the cabinet was held this morning, which resulted in arresting the progress of the expedition to Nicaragua. Intelligence from the government of Great Britain on the subject of the recent intelligence from Honduras, and the English intervention in behalf of the Mosquito Kingdom, induced the Secretary of the Navy to instructed to report forthwith to the Executive the effective force at his disposal for active operations.

The office seekers are in great consternation, as the consideration of their demands must yield to the urgent condition of our foreign relations.

Schuyler Livingston, Theodore Sedgwick, and R. H. Field, have been solicited by a number of Congress from the city of New York, Mr. F. B. Cutting, to become candidates for the office of Collector, but with the advice of Gov. Marcy, which they have declined, not wishing to enter into competition with Mr. Schell.

The Metropolitan Englishmen have gone home in despair, and the desperation of the free coiffeurs knows no bounds. The latter are making terrible havoc with the tuneless ambitions of Gridley, Kingsley, Sanford, and all those of prominence. The barbarous programme for New York appointments, as presented for Gov. Marcy's consideration, is as follows:—For Collector, Ira Davis; for Surveyor, Hoffman; for Naval Officer, Daniel E. Delavan; Naval Officer, Jacob Sanford Jones; Postmaster, N. J. Waterbury; Surveyor, Daniel E. Delavan; Naval Officer, Jacob Sanford Jones; Appraiser, Hiram Barney; Assistant Appraiser, A. H. Shepard; and Marshal, Augustus Bleecker. This is the end conflicted to Tilden's management. It may be modified by substituting the name of Ralph Ogden or Xavier Haverneyer for Collector, and Fernando Wood for Navy Agent.

OBSERVER.

BUFFALO, March 17.

A gentleman from Washington reports the following nominations as having been sent to the Senate for Michigan:

Indian Agent, Gilbert of Coldwater.
Secret mail agent, Hart of Lockwood.
Register Land Office, Saginaw, Lee.
Surveyor General, Chapman of Jackson.
Receiver Land Office, Bell of Ionia.
Register Land Office, Ainsley of Lapeer.
Receiver Land Office, Attebury of Kalamazoo.
Register Land Office, Vanderwalker, Kalamazoo.
U. S. Marshal, Rice, Kalamazoo.
Collector and Post-master, Detroit, not made, but Harmon and Walker supposed will be the fortunate men.

☞ When the Ericsson engine is introduced on the Mississippi River, and the cities, Missouri and Arkansas, a force of six hundred men are now employed on a boat, twenty or thirty will be employed; and where $100 worth of fuel will be used, one thing will be worth $10 or $20 substituted. New Orleans will then be better able to compete with the East and North than she now is, for freights will fall enormously, and the river will thus be enabled to compete to some advantage with railroads.—*New Orleans Picayune.*

☞ The Admiralty is nearly first build four of Cape Hatteras, say the U. S. Coast Surveyors.

30000 LADDERS WANTED!

A Car Builder can find employment on the line of the Illinois Central Railroad. This portion of the line runs over prairie, and will be benefited by any section of the State. Contractors are already engaged for provisions and forage on every section of the road, sufficient to accommodate the above number of men. Payments will be made promptly on the 15th of each month. We have work on hand that will furnish constant employment for a large number of men, for the next three years.

Proposals will be received from Chicago to the 30th of April, for supplying or any portion of 30,000 Ladders.

DAILY TRIBUNE.

W. A. STEWART, Commercial and Local Editor.

CHICAGO, MONDAY, MARCH 21, 1853.

JOB PRINTING.

We have just added a large stock of new and beautiful type to our already extensive assortment, and are now ready to do all kinds of JOB PRINTING at a short notice, and in the most approved style. Our prices for printing will be found as low as the same quality of work can be done for in this city.

Orders left at the Counting Room, on the ground floor, and those at the Post Office, will be promptly attended to.

Contain as it is 28 columns.—The demand for the paper at the counter of the Trade and Commerce of Chicago, published in Saturday's Tribune, far exceeded our calculations. Six hundred copies were sold at the desk before eleven o'clock in the morning, and the sale continued steadily till a late hour in the evening. We were obliged to publish two large extra editions, and yet we are confident that not a tithe of the papers which ought to go throughout the United States have yet been sent. It is impossible to estimate the advantage to Chicago which will accrue from a broad and early sowing of this good seed. It is sure to bring forth a rich harvest of capital sent on, enterprising people coming to settle here, manufactories started, and the circle of trade enlarged. Let every citizen, whether merchant, manufacturer, lawyer, or mechanic, make out a list of all his respectable acquaintances and send him a copy. We have put the price of the paper down to three cents in order that every one can do this without making any drain on his purse worth regarding.

☞ The large number of new advertisements for to-day crowds our local items into this page.

ORIENTAL TRADE.—The first report of the season of arrivals and clearances on the canal will be found in to-day's paper.

FOR THE LAWYERS.—We publish this morning, for the benefit of the Lawyers of Chicago, numbering one hundred and fifty-seven, and of that unfortunate class of people who go to law, numbering nearly as many more, a schedule of the Courts to be held in this year during the east, year. As every one is liable to want to know when a Court is to be held, either as juror, witness, plaintiff, defendant, counsel, judge, criminal or lunatic, every one would do well to preserve this schedule.

RAILROAD CELEBRATION.—To-day the good people of Peru, and all who will join with them, are to have a grand jollification over the completion of the Chicago and Rock Island Railroad to their flourishing young city. We understand a number of our citizens purpose going down this morning, and joining with our neighbors. May they have a good time! We regret that the demands of a daily paper will prevent us from accepting the kind invitation received from the citizens of Peru.

FREIGHTS.—We are gratified to learn that Pork, Beef, and other rolling freights, will nearly all come through this route the present season, instead of going South, as they have mainly done, heretofore. This is occasioned by the high freights between New Orleans and New York, which entirely prevents shipments by that route.

☞ We learn that from the 5th day boats will run regularly from Detroit to Cleveland, in connection with the Michigan Central Railroad.—Passengers leaving Chicago by the morning train will take the night boat at Detroit, and after a pleasant night's rest, wake up and find themselves at Cleveland. By this line passengers are now booked through to Buffalo, taking the cars at Cleveland. Fare to Cleveland $8.

MR. BRADBURY OF NEW YORK.—Our readers will note by reference to our advertising columns that the above named gentlemen so long and so extensively known as the children's Singing and Piano Forte teacher, having taught them by thousands, is now engaged as a dealer in Pianos and Melodeons, being compelled as we understand, to leave his field of useful labor in consequence of ill health. From his great experience with the Piano he must be qualified to judge of its merits. We cordially wish him success, and recommend our readers to send him their orders.

People's Bank.

Such is the name given to a new Bank of issue and discount which it is proposed to establish in Chicago. There are certain wants which Business in this city demands, and has for some time, long ago, indicated the necessity for a larger currency. There is not enough of the instrument of exchange property to carry on the business of exchange. 2d. Business demands that this currency shall be of a legal character. Business is disgusted with shinplasters institutions, and personal credit as the foundation of a paper currency. 3d. Business demands a legal Bank of sufficient power to hold its own firm and independent position which shall be the balance wheel to the currency. 4th. Business demands that this Bank shall be so organized that the business men as a class shall be its controllers.—5th. Business demands a lower rate of interest than ten per cent. A movement is being made to meet these demands. This movement consists in the circulation of a subscription paper, of which the following is the preamble:

The undersigned, believing that the facilities afforded by the Banks now transacting business in the city of Chicago, are entirely insufficient to meet the wants of the community, that the operations of a few men of this city possess means and influence sufficient to establish and sustain a Bank with a capital of two millions of dollars, and that such an institution should be organized, opening to all the advantages to its stock, and making it emphatically a "People's Bank," therefore agree to subscribe the am't set opposite their respective names, toward such stock, conditional that the subscriptions shall reach in the aggregate one million dollars, and conditional that at the organization of the Bank not more than twenty-five per cent of the subscriptions shall be called, nor the remainder within one year thereafter.

The response which this call meets evidences the extent and pressure of the demands which Business is making. The amount already subscribed would seem large at any time, but in the present stringency of the money market, it is surprising. We commend the subject to the thorough attention of our business men. Something must be done. Something will be done. Let that something be done in the right way.—We invite the discussion of the subject through the columns of the Tribune.

☞ It will be seen by the telegraphic despatch, that Wm. H. Seward took has been appointed to the Collectorship. What will the Young Democracy and their organ, the *Democratic Press*, say to this? Come, gentlemen, express your minds freely—you will feel better for it. Those resolutions were a good beginning. Only keep on.

DREDGING THE RIVER.—On Saturday a very powerful dredge commenced operations at the north west corner of Clark st. bridge. At the same time that it deepens the river it is filling up the dock at the side. This improvement will be of great value when completed.

GYMNASTICS.—The communication on this subject in another column is very readable, to say the least. But more than this the subject matter is important. We trust that it will lead to something being done either by private or associated enterprise. For ourselves we should rejoice to have some place where we could find relief in a healthy and sensible way, from the wearing toil of editorial life. Who will move in the matter?

RESIGNATION OF JUDGE DICKEY.—Hon. H. T. Dickey, Judge of the Seventh Judicial Circuit, has forwarded his resignation to Governor Matteson.—The resignation to take effect on the 4th of April next. Meanwhile Judge Dickey will attend the regular sessions by holding a two weeks term of his court in Lake county, commencing on Monday next, the 28th inst.

We are not apprised of the reasons which have induced Judge Dickey to take this step. He has been on the bench a number of years, in which capacity he has not only won for himself many personal friends, but by his gentlemanly demeanor, his firm and consistent course, and his enlightened decisions, has acquired the confidence and esteem of the bar, and a reputation as a jurist which but few men of his age have attained.—*Democratic Press.*

☞ Flat tooth combs are now made of india-rubber.

FOR BOYS,
Between 4 and 5 in the Brick Presbyterian Church.
A. J. SAWYER, M. A. Principal.
THE SECOND QUARTER of this School will commence on Monday, January 3d, 1853. Boys from the Primary School, Young Men and Lads only are admitted; but this limits us not as to number or ages; are received into the Primary School. The closest attention will be paid to the conduct and morals of pupils out of school hours, as well as in the time they are under the immediate charge of the Principal and Assistants. Circulars can be had at the Principal's Residence, 74 Lake street, where the terms, &c., may be learned, and where their own children and wards are connected. For Terms, &c., see circulars.

Mathematical and Classical School,
FOR MALES AND FEMALES,
(OPPOSITE THE CITY HOTEL.)
No. 140 Lake Street, Chicago, Ill.
THE THIRTEENTH TERM will commence on Monday, February 7th.
The Institution, of more than three years standing, affords facilities for a thorough English and Classical education.
Pupils received at any time, and charged only for the period they attend. Students in the Mathematical and Classical Departments will be charged extra.
Parents have been taught to place confidence in the most implicit manner in the Principal, and he will endeavor to merit it. Pupils will be required to attend punctually at recess—to make their studies familiar with principles—to recite without hesitation—to behave politely—to dress neatly—to keep their persons and apparel clean—to study and recite in a low tone of voice.
The Principal has had fifteen years successful practice in teaching, and has never had a pupil leave his school for the purpose of attending an Academy in the East and returning to Chicago.
The number of pupils is limited to 60, and not more than 20 will be received in the Classical Department. Should the number of pupils be full, we will refer to those under the first half a term.
We desire no application except such as wish to improve, and are willing to be governed by the rules of the school and attend to lessons.
Terms, $5, $6 and $10 per quarter, always in advance—according to the studies pursued.
Rooms open to visitors at all times.

Chicago Piano Forte Manufactory.
THAT which was an experiment is now a fixed fact. The subscriber has established a

PIANO MANUFACTORY IN CHICAGO.
The experiences of the advertisers in their business in Europe and the United States, with unlimited pecuniary means, will, certainly and perseverance, that Musical Instruments of the first class, of every kind, in general use, can and have been manufactured in Chicago, which in volume, tone, and elasticity of touch shall not only be equal to those of the best manufactories in the East, but in many instances superior. Having had many years practical experience in the manufacture of Piano Fortes, all of which having given the utmost satisfaction, I am willing to refer to any number of families in the city of style or improvement in their line, one of the Proprietors of which has been actively engaged in the manufacture of Piano Fortes for the last fifteen years, and the remainder of the firm have had a practical education in the art for a period of seven years.
The subscriber has on hand a large assortment of Musical Instruments in their line, will find it to their advantage to call and examine before purchasing elsewhere, as they are determined to sell as cheap as can be sold in the East, and warrant every instrument sold by them to be in every respect as represented.
